1. Processing of pearled barley is mechanical and does not require use of water.
2. Follow family custom.
3. Some opinions hold that, even according to the stringent tradition of not selling chametz gamur, provided the chametz is not distinguishable in the product even if it is present at more than a kezayit, it can be included in the sale (Rav Yosef Dov HaLevi Soloveitchik, quoted in Nefesh HaRav, page 177).
4. Although malt in corn flakes and crispy rice products is present at more than one-sixtieth of the product, in standard packaging the malt

is less than one kezayit of the package.

5. Contemporary milling production renders flour only safek chametz and therefore it can be included in the sale.
6. Flour as an ingredient in processed food is typically exposed to some form of moisture and should be assumed to be chametz.
7. Typically, non-GMO starch and starch derivatives (like maltodextrin) are sourced from Europe, and should be assumed to be chametz.
8. Wheat is used in traditional soy sauce production
9. Wheat germ is a byproduct of the milling process – see footnote 3
